OBJECTIVE

To apply my knowledge of Java, SQL, Python along with my AI specialization, to build efficient applications and improve my skills.

EDUCATION

Parul University Aug 2020 - May 2024
Bachelor of Technology, Computer Science & Engineering, AI specialization
CGPA: 8.49

Sri Saraswathi Junior College Jun 2018 - May 2020
HSC
CGPA: 9.5

Nethaji High School May 2017 - Apr 2018
SSC
CGPA: 10

WORK EXPERIENCE

Tata Consultancy Services 2025 - Now
ILP Trainee

Developed web applications using Java, JDBC, Servlets, JSP, and SQL, focusing on backend logic, database connectivity, and dynamic web page creation

SKILLS

Programming Languages	Java, Python, SQL
Web Technologies	HTML, CSS, Basic JS, Servlets, JSP
Database Management	JDBC, SQL
AI & ML	Basics of Artificial Intelligence & Machine Learning

PROJECTS

Train Ticket Management System
(Feb 2025 - Mar 2025)

Customer	ILP Case Study Project
Description	Developed a web-based system using JDBC, JSP, Servlets, and Core Java for train ticket booking and cancellation. Implemented user authentication, train schedules, and database connectivity for real-time ticket management
Team size	5
My position	Software Developer
My responsibilities	Fetches data from the database using SQL and JDBC, processes it in Servlets, and sends it to JSP for display on the web application
Technologies used	JDBC, JSP, Servlets, and Core Java

Virtual Mouse Control Using Hand Gestures

(Nov 2022 - Mar 2023)

Customer	College Project
Description	Developed a hand gesture-based virtual mouse system using Python, OpenCV, and cvzone. Implemented real-time hand tracking to control mouse movements and interact with the system using gestures. Integrated pynput for mouse control and Tkinter for UI elements
Team size	4
My position	Software Developer
My responsibilities	Implemented hand gesture recognition using Python, OpenCV, and cvzone to control a virtual mouse, integrating pynput for actions and Tkinter for UI
Technologies used	Python, OpenCV, cvzone, pynput, Tkinter
