PROFILE

Experienced engineer with 5 years in the software industry, focusing on system-level development and cloud infrastructure. Demonstrated success in delivering scalable solutions and driving projects in enterprise automation and web applications.

EXPERIENCE

Google, Bangalore, India
Senior Software Engineer

Bangalore, India
May 2023 – Current

Modernization

- Built robust AI-driven analytics tools for user engagement, boosting customer retention and adoption metrics.
- Developed real-time diagnostics solutions to streamline issue identification and resolution, reducing response times by over 30%.
- Led end-to-end implementation of microservices-based APIs, resulting in improved scalability and reduced downtime.
- Established automated deployment pipelines, accelerating the release cycle and minimizing manual intervention.
- Enhanced code quality by implementing rigorous unit and integration testing, increasing code coverage to industry standards.
- Integrated security best practices into development workflows, ensuring compliance and proactive risk mitigation.
- Improved accessibility and usability across core products to better serve global enterprise users.
- Managed high-impact production incidents as part of the on-call team, ensuring rapid and effective problem resolution.

Amazon, Bangalore, India
Software Engineer

July 2021 – May 2023

Order Management - Add to Delivery Feature | Python, JavaScript, SQL, Tomcat, Jenkins

- Collaborated with cross-functional teams to design and launch a seamless “Add to Delivery” option for Prime members, enabling last-minute additions to existing orders.
- Developed intelligent backend services to validate item eligibility, update delivery schedules, and ensure real-time consistency across mobile and web platforms.
- Optimized data flows and batch processing for scalable order aggregation during peak Prime Day events.
- Enhanced customer experience by implementing fast rollback and undo capabilities for recently added items.
- Implemented comprehensive automated testing and monitoring strategies, improving feature reliability and post-release quality.
- Conducted risk assessment and incorporated robust security controls to safeguard transaction data and user activity throughout the entire order cycle.

EDUCATION

Indian Institute of Technology, New Delhi
• Bachelor of Technology in Computer Science GPA: 7.9/10

New Delhi, India
2017 - 2021

TECHNICAL SKILLS

Languages: Java, Python

Technologies: GCP, AWS, Spring, Hibernate, Maven, Grafana, Kibana etc.

AWARDS & ACHIEVEMENTS

- Received employee of the year award in Amazon Prime division Nov 2022
- Received an award given for being outstanding performer in the organization June 2023
